Specifically records related to the firm described as "One facility processed and manufactured with poultry waste in the report "Final Feed Investigation Summary - California BSE Case - July 2012" which is available on the FDA website. The focus of our request is whether or not the infected cow was likely exposed to ruminant meat and bone meal through the feeding of the form of poultry waste known as poultry litter. In addition we would like to better understand FDAs risk communication about the feed particularly how FDA chose to communicate to the public whether or not the cow was actually exposed to ruminant meat and bone meal through poultry litter.
